

Football league question sheet

7.4P2b

Use the league table spreadsheet to answer these questions.

1 Matches this week finish with these results

Liverpool	2	Norwich City	1
Arsenal	0	West Ham United	0
Leeds United	3	Newcastle United	4
Manchester United	1	Everton	1
Southampton didn't play this week			

Update the league table by entering these results.

Save the updated league table.

2 Sort your updated table to find out which team has most points. Which team is top of the league? Which team is bottom?

Top team:
Bottom team:

Save your sorted league table.

Spreadsheet models allow you to ask 'What if ...?' questions so that you can predict what might happen in the future. Try these questions. Remember to reset the values for each question by reloading the saved file from question 2.

3 The next three results for Newcastle United are a win, a loss and a draw. How many points does Newcastle United have now?

..... points

4 Liverpool loses all the rest of their games. How many games would Southampton have to win, in a row, to have more points than Liverpool?

..... games

5 The number of points for a draw is changed to 2. Which team now has the most points?

.....

Extension

Write down a question of your own and ask another pupil to try to answer it.

Was it possible to answer the question, using the spreadsheet?

.....
